- Secure packaging

PORTRAITS BY GRACE

Grace is both a self-taught portrait artist and classically trained, having studied at the Sacred Art School in Florence for one summer. Her portraiture combines traditional techniques with a distinctive personal approach, blending strong likeness with subtle characterisation. Her brushwork is precise and finely blended, with a preference for flat, refined surfaces when rendering faces. Backgrounds are typically low-lit and understated, though she can incorporate meaningful elements or environments familiar to the sitter upon request.
